

TE~~X~~ REPORT

Of local interest... Not earth shattering... Yes ... there is still time to ignore some of the important things, so why don't we just set back and pick our teeth with a 6 penny nail and give these items a little of our important time. Happy hundredth birthday goes out to Foley. There are still brick masons in i n the area, from whence ever they come. The clock tower is a nice addition to the city. CONGRATS!

Not much new work on the "Blue Colar" entertainment complex happeningly lately. Some heavy equipment was seen on line, for a hopefully New Years start. Highway 83 north from the O.B.E. near Hwy. 59 is completed. Property lines and back door views are a little rough yet, but come spring you will see some beautiful additions. The Hwy 48 drop off to the Rdale Wal Mart is really nice too.

Speaking of beautiful.. A treat to be hold... Going north from 104 on new 13 (Judge Wilters Bridge) About 2 miles up the road going at the posted speed, you will be able to take in the beautiful view of what I call "Soliders Row". A virtuaial mile of gogirous manicured wild flowers, backed by tree after tree, like a parade in review. Gazing apast the leaves, glistening with a light dew and the beautiful Alabama sunrise as your shaparone. Well worth your time and effort. How about a "God Bless America" and throw in a "AMEN" for good measure!

Seems like a pretty ho hum pecan crop this year. I'm going over to B&B in Fairhope to stock up myself. Was recently back in the hospital. Was so aptly informed about my colestrol count being too high. Even to much good is bad and so on... Walnuts and Pecans have the highest content of oil that is bad for all of us. I reccomend not eating them whole. Crushed, copped or in pieces in cassoroles, suyfleys, used as filler, ingredient in a crunch dish or topping for garden salads. The healthist uses being in apple salad, with celery, rasins, little masrhmellows and other goodies Honey always puts in with them.

The world is still turning the same direction. And yes,water can flow North or South from different parts of the world.... But it still all runs down hill. And you can take that to the bank with you. We need to devote some time to the transistion of 1800 design and implmentation of streets, by-ways and thouroughfares in our community to the needs of our modern hustle and bussle scurry about life style . No special turn lanes on state highways. It wasn't a state highway untill in the1970's anyway. Besides the horses had to slow down to almost a stop anyway.

What do you mean... the road isn't wide enough? Pull off in the greass... we can scrape mirrors, and get by. But remember, if you are from anywhere else and want to stop and chat with 2 cars "ghetto" style you will be creating a traffic jam. What traffic... I don't see anybody ahead of me. I shure have respect for farmers tho. As a rule, if it's Green and Yellar it doesn't come out on the road lessin its worth from \$125 thousand to \$350 thousand dollars. Even drivin a BMW makes me feel cheap.

Good to visit with you. I'll change the words around some next time, but it will probably be about more of the same stuff. Persimmons sure are good eatin'.
